

RATTLEBOX NATURE CENTER, LTD

Description:

Rattlebox Nature Center in Wawa, Pennsylvania (near Media) is an educational facility. Rattlebox Nature Center was conceived and created in response to an awareness that in our increasingly urban and technological society many children exist with little experience or appreciation of the animals with whom we share this planet and the natural world that surrounds us.

The goal of Rattlebox Nature Center is to provide individuals of all ages and capabilities with hands-on experience that will better their understanding of the critical role that animals play in the health and welfare of our world and to dispel false stereotypes and myths regarding their behavior and characteristics.

To accomplish these objectives Rattlebox Nature Center provides supervised contact with animals, horse care and introductory riding, nature focused workshops and art projects. During the summer months these activities are also presented through a day camp for children. Additionally, an animal presentation and educational program is available offsite at locations such as retirement facilities, schools, private homes, camps and shelters. www.rattleboxnaturecenter.com

Serving the Delaware Valley area.
